

# Students for Change | Growth Timeline

## Our Goal

Build a global network of educators, youth leaders, and community organizations equipped to deliver Students for Change programming.

## Pilot Impact to Date:

960+ Students • 35+ Schools • 7 Community Partners • 1 Facilitator

### **Phase 1** : *Pilot the Impact Coach Model | Summer 2026 - Spring 2027*

Launch a pilot cohort of educators and youth leaders to test and refine the Train the Trainer model. Participants will complete recorded training modules, attend virtual training sessions, implement the program with their students, and provide feedback to strengthen the curriculum, and delivery model.

### **Phase 2** : *Production & Platform Development | Spring 2027 - Fall 2027*

Use feedback from the pilot to transform the Impact Coach pilot into a production-ready certification program. This phase includes professional curriculum production, recorded learning videos, a resource library, CRM and evaluation systems, and supporting technology.

### **Phase 3** : *Scalable Implementation | Fall 2027 - Spring 2028*

Launch the first fully scalable version of the Students for Change model. Schools and community organizations will be able to train educators, access the digital platform, deliver programming, track student outcomes, and collaborate through a growing network of certified Impact Coaches. This phase also lays the foundation for future student-facing resources and technology.
